

# Data Governance Reimagined: What's the Business Value of Data Governance?

Andrew Joss

*Head of Solutions & Data Governance – EMEA-  
LA*

Informatica™

# Data 3.0 – Trending By 2020

## Explosion in Data Volume

---

**15.3 zettabytes  
per year**  
in global data  
center traffic

## New Users

---

**325 million**  
business data users  
and growing

## New Data Types

(mobile, social, IoT)

---

**20 billion**  
connected devices

## Data in the Cloud

---

**Over 92% of data  
center traffic**  
will come from  
the Cloud

## Machine Learning/AI

---

**1 billion workers**  
will be assisted by  
machine learning or AI

So, Data Governance is also important

Regulations

Data is the foundation for digital transformation

# ENTERPRISE UNIFIED METADATA INTELLIGENCE

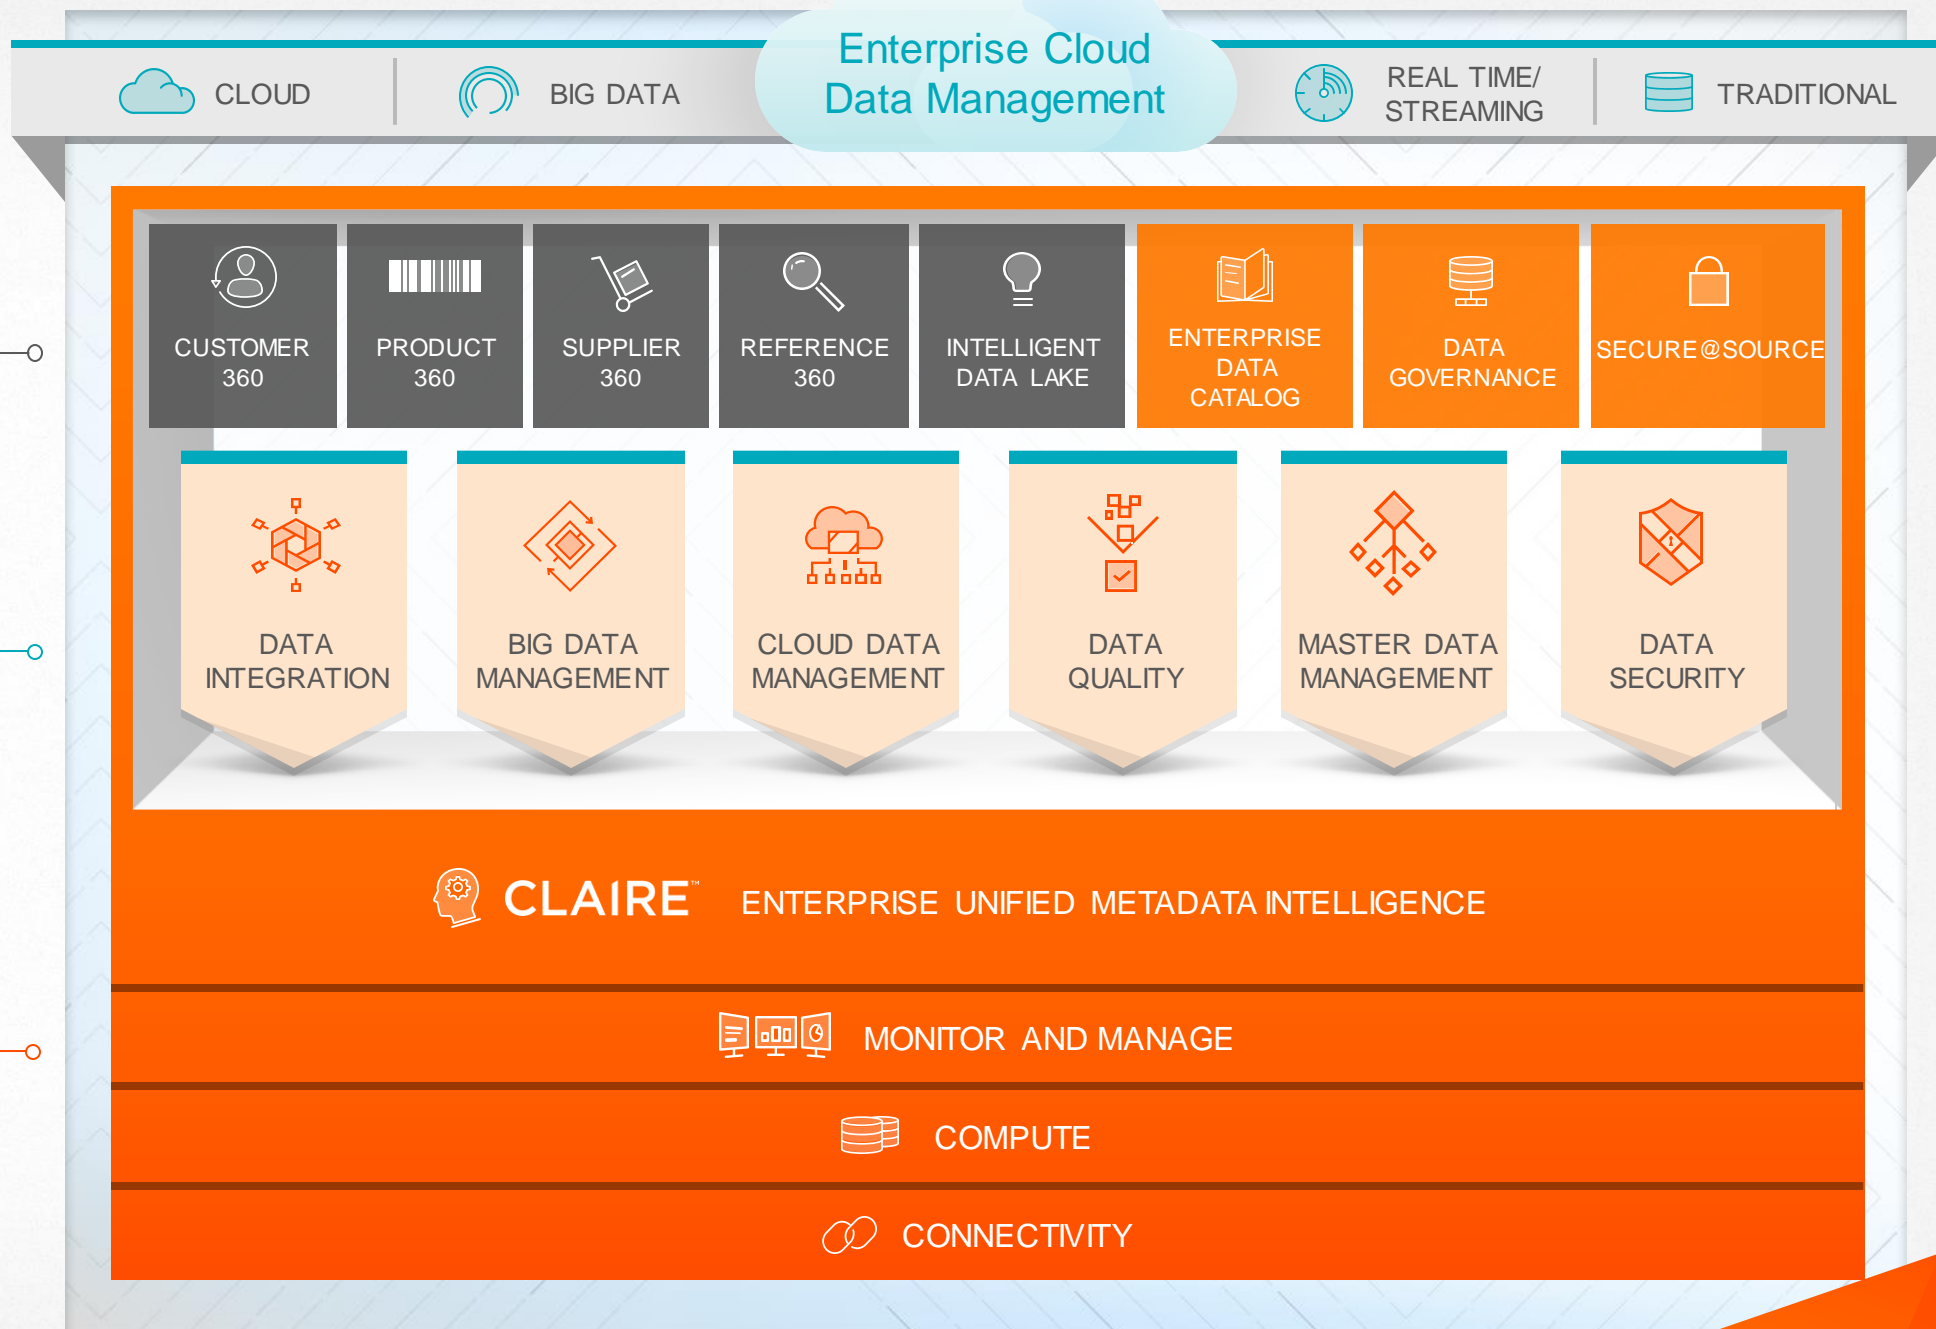

# 5 Principles of Intelligent Data Governance

1. **Enable collaboration** across all data stakeholders.
2. Connect the governance efforts with the **technical and operational efforts**.
3. Enable the data governance stakeholder to act with authority and confidence to **achieve measurable results**.
4. Empower the data governance stakeholder **to always be in control**.
5. Access to **all data consumers** in the organization.

## Solutions

## Products

## Intelligent Data Platform

# Examples in understanding the Business Value of Data Governance

# Transformation initiatives are driving Data Governance

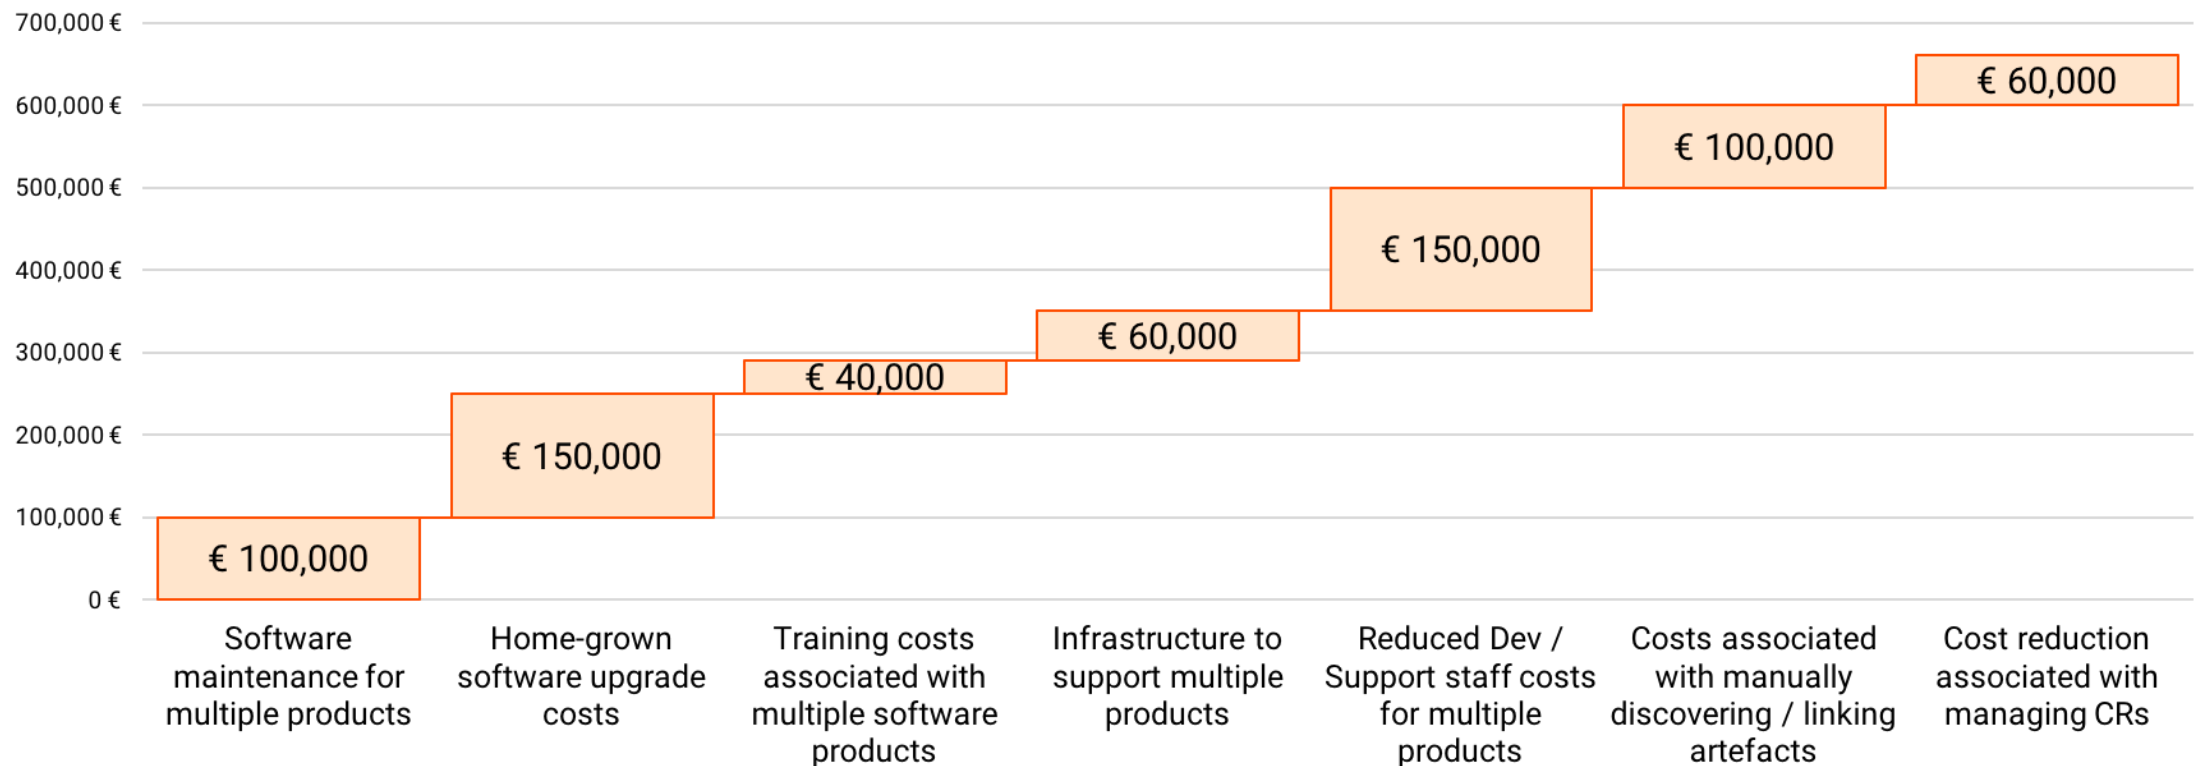

But organisations want to know what Business Value it creates

# Regulation and Compliance

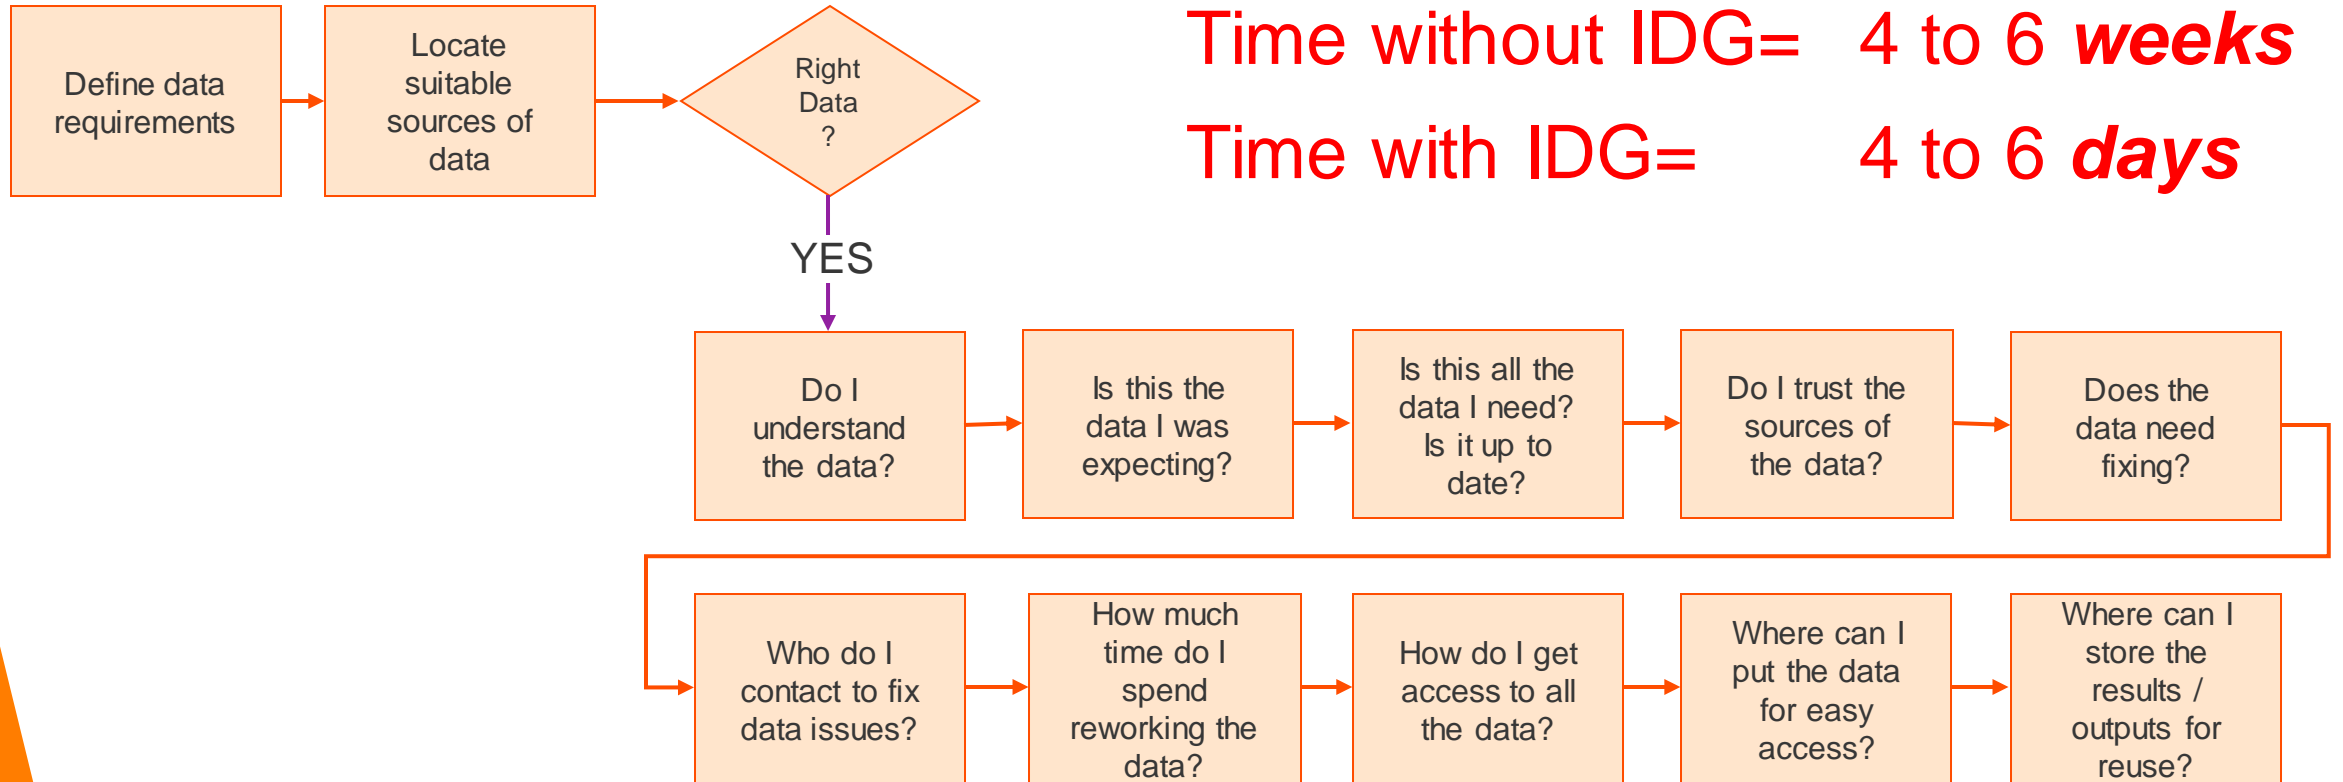

A single Data Governance platform can save money due to common sets of requirements across regulations

Benefits of a single, integrated Intelligent Data Governance platform

# Next-Gen Analytics

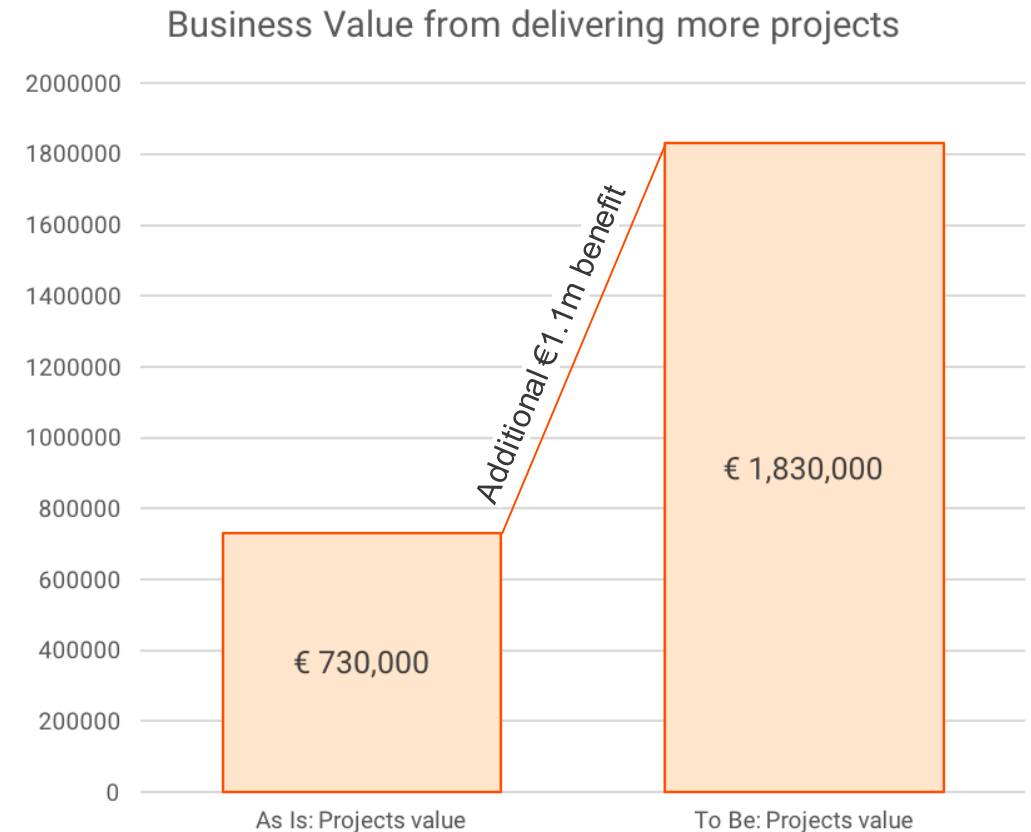

Data prep time savings through integration, access and reuse

# Next-Gen Analytics

Potential benefits of moving from 80% data prep to 20% data prep

- Potential net increase of **11** more Next-Gen Analytics projects per annum
  - Due to having more resource bandwidth & availability
  - Shift from 80% data prep/20% analytics, to 20% data prep/20% analytics
- Incremental Benefit
  - If each Next-Gen Analytics project yields €100k of financial benefit, the value of extra projects provides an additional **€1.1m** of benefit

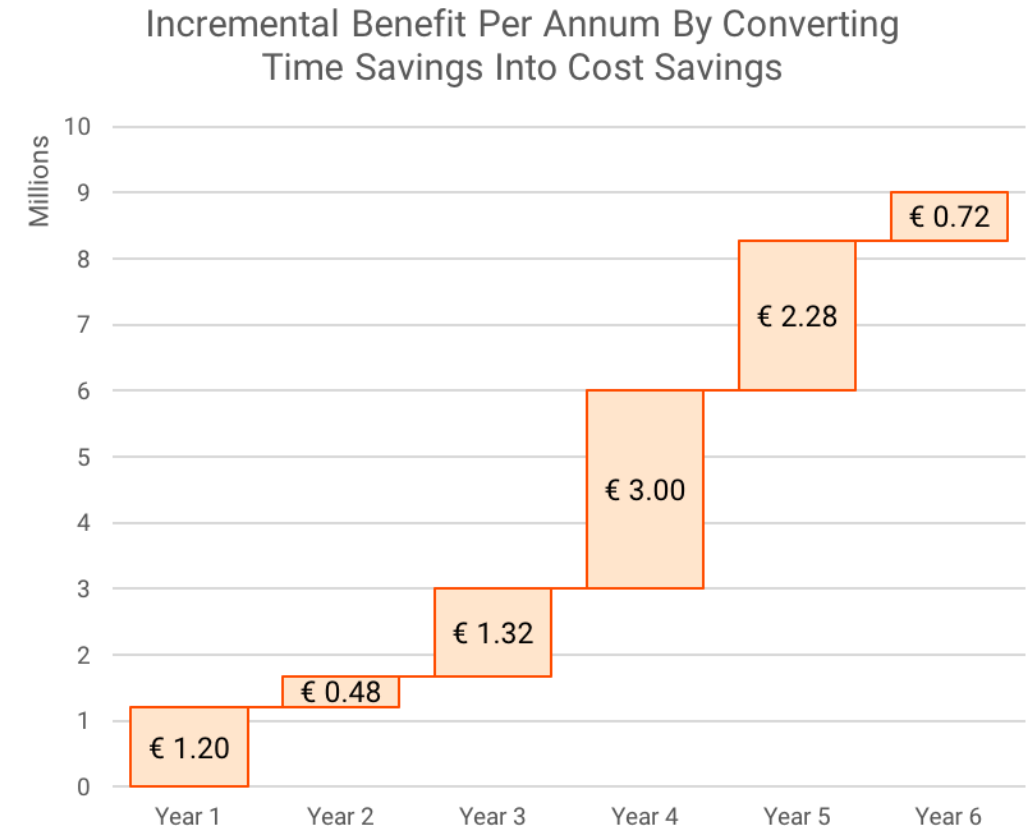

# Data Democratisation

Improving Knowledge Worker productivity through access to data and insights

- Organisations have many users classed as 'Knowledge Workers'
  - Spending a considerable portion of their working day finding, assessing or fixing data
- Having access to all relevant data, in one App, should:
  - **Reduce the time spent finding, assessing or fixing data**
  - Highlight gaps in knowledge & foster collaboration to improve data use

# In Summary

- Organisations are recognising the importance of Data
- So if Data is important, Data Governance must also be important
- Organisations need new ways of making Data Governance work across the enterprise
- Understanding how Data Governance drives Business Value, helps convince people it's worth them investing their time in
- Intelligent Data Governance is the only way to go!

# Thank You
